

# **Jupiter** **Zentralmeridiane im System II** **Oktober 2026** (in UT, $\Delta T = 70$ s)

Zentralmeridiane sind angegeben, wenn Jupiter sichtbar ist und die Sonne maximal 10° über dem Horizont steht. Sie sind für 10° geografische östliche Länge und 50° Breite berechnet.  
Sie beziehen sich auf die geometrische Planetenellipse und sind nicht auf den beleuchteten Teil reduziert.
