

**Jupiter**  
**Zentralmeridiane im System II**  
**November 2026**  
(in UT,  $\Delta T = 70$  s)

Zentralmeridiane sind angegeben, wenn Jupiter sichtbar ist und die Sonne maximal  $10^\circ$  über dem Horizont steht. Sie sind für  $10^\circ$  geografische östliche Länge und  $50^\circ$  Breite berechnet.  
Sie beziehen sich auf die geometrische Planetenellipse und sind nicht auf den beleuchteten Teil reduziert.
